

Building the Stable

1.

Cut out the 2 background (the pictures with windows) and cut out the white

edges and combine them together to look like this

2. Fold this along the dotted lines

3. Cut out the middle part and the bottom of the hut (do not cut the white edges part of the hut since we are going to fold it)

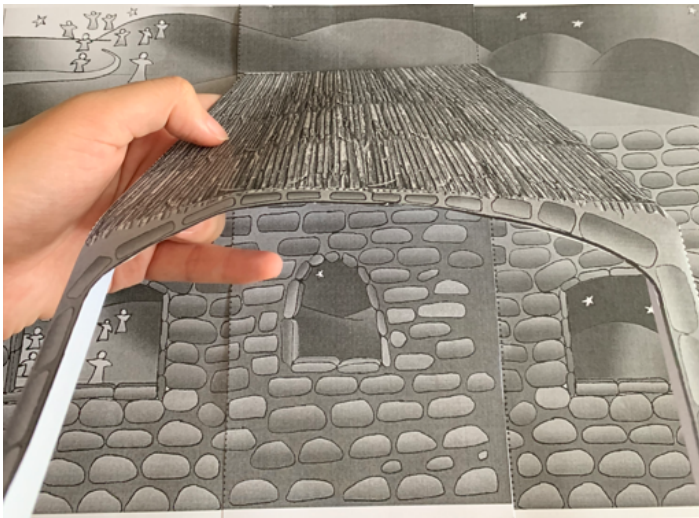

4. Fold the left and right section of the hut first
5. Fold the middle left and right slant of the hut then fold the top part of the

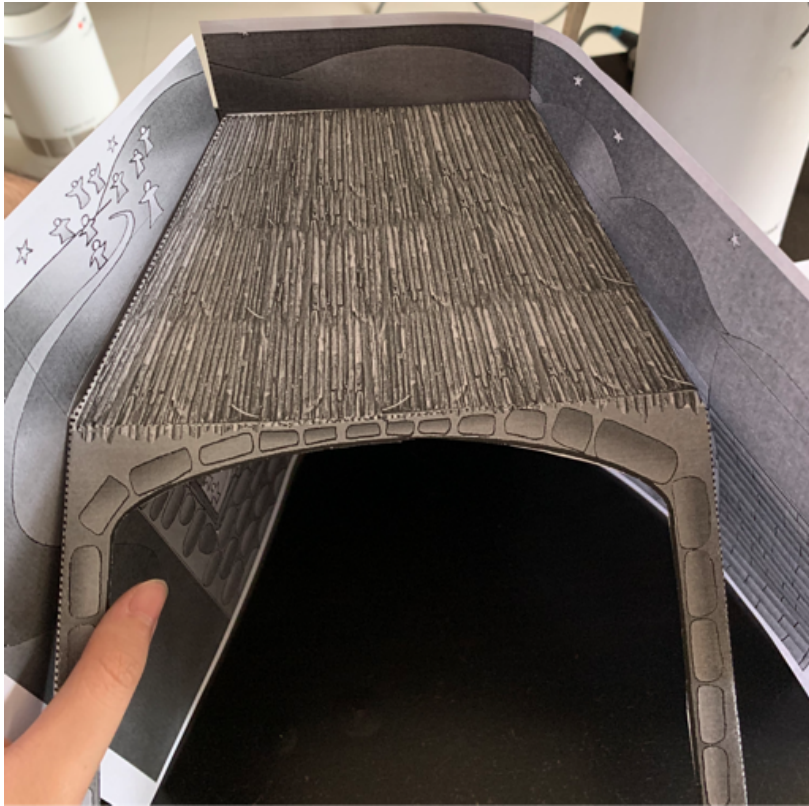

hut

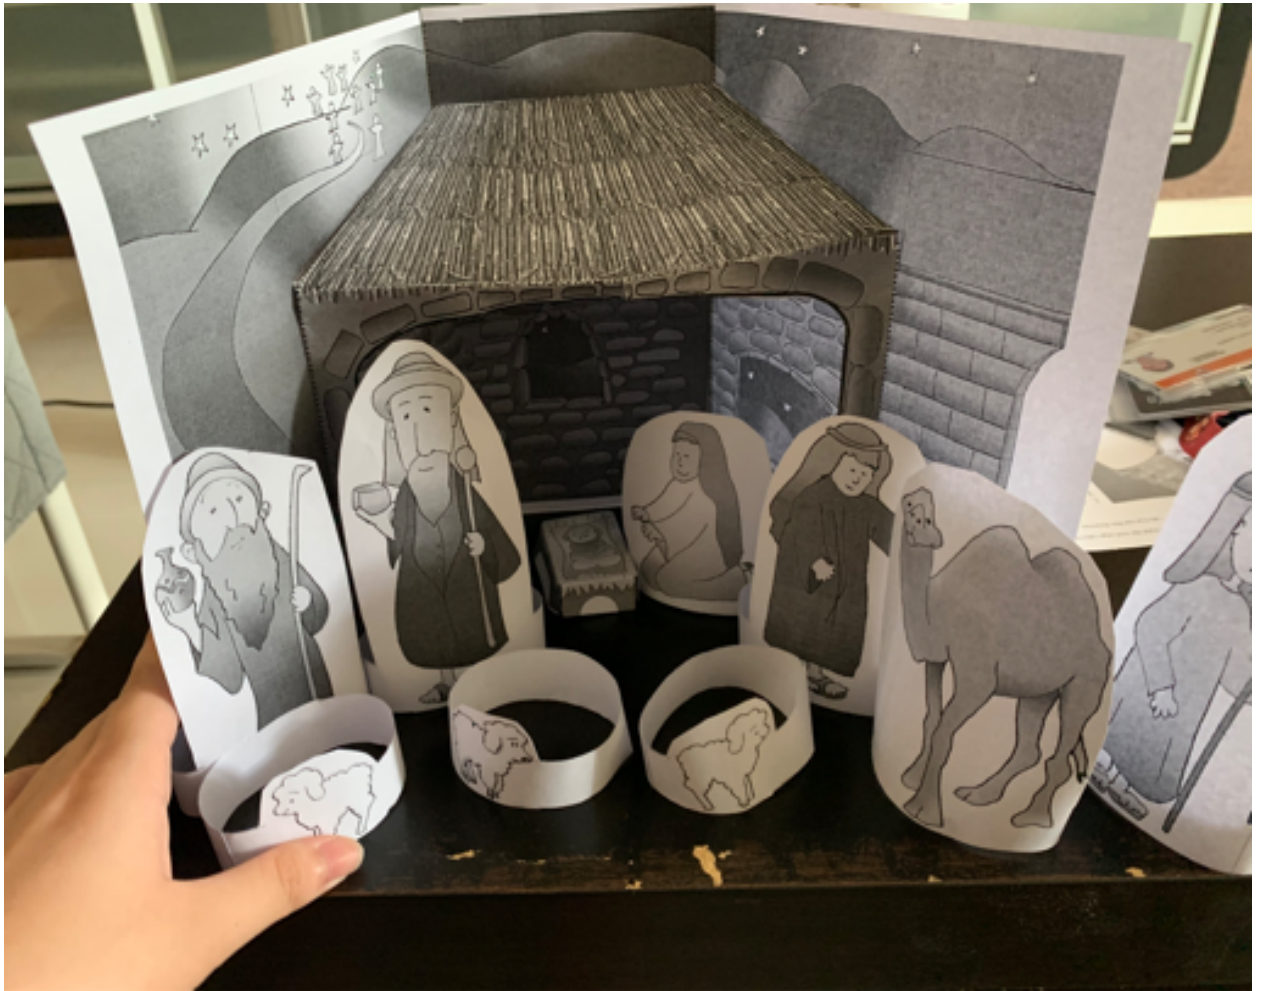

6. Stick the top section of the hut to the wall without bricks.

7. Stick the left and right top edge of the hut to the left and right walls

8. The end result will look like this

9. To build the figures, cut out the figures along with the long white attachment. Stick the two ends of the white attachment.
